halo

BRAND BOOK · VERSION 1.0 · 2026

AI that feels like second nature.

CONTENTS

Light, not machinery.

A halo is soft light that surrounds you. It doesn't ask for attention, it helps you see. This book shows how Halo looks, sounds and speaks, so every touchpoint feels like the same calm, capable companion.

01 Mission, audience & principles

02 The Open Ring — logo system

03 Color & accessibility

04 Typography

05 Voice, tone & sound

06 Imagery & visual language

07 Applications

01 · MISSION

Make technology feel like a natural extension of what you can do.

Halo is an open-source, privacy-first personal cognitive assistant. It connects voice, vision, memory, everyday tasks, phone controls and wearables into one experience. It runs on your device first and reaches for the cloud only when you choose.

On-device first | Open source | Your data stays yours

Everyone. Starting with the curious.

Now

Early adopters

Alpha testers, open-source contributors, makers and tinkerers who want to shape a genuinely useful assistant.

Next

Everyday people

Students, families and privacy-conscious users who want AI that actually helps with daily life.

Always

The not-so-techy

Children, older adults and anyone who finds tech intimidating. If they feel at home, everyone does.

Design test: could a 9-year-old and a 79-year-old both understand this at a glance? If not, simplify.

01 · BRAND PRINCIPLES

Three words. Every decision.

Futuristic

Technology from tomorrow, shown with restraint. Light, glow and space instead of circuits and chrome.

Human

Warm, honest and a little playful. Halo shows its results and its failures. It talks like a friend, never a machine.

Effortless

Nothing to operate, nothing to decode. Fewer words, bigger type, one clear action at a time.

We are **not**: robotic · mystical · corporate · hype-driven · intimidating

Our primary logo.

PRIMARY LOCKUP — MINT GRADIENT RING + NIGHT INK WORDMARK ON CREAM

02 · WHAT THE MARK MEANS

An open circle.

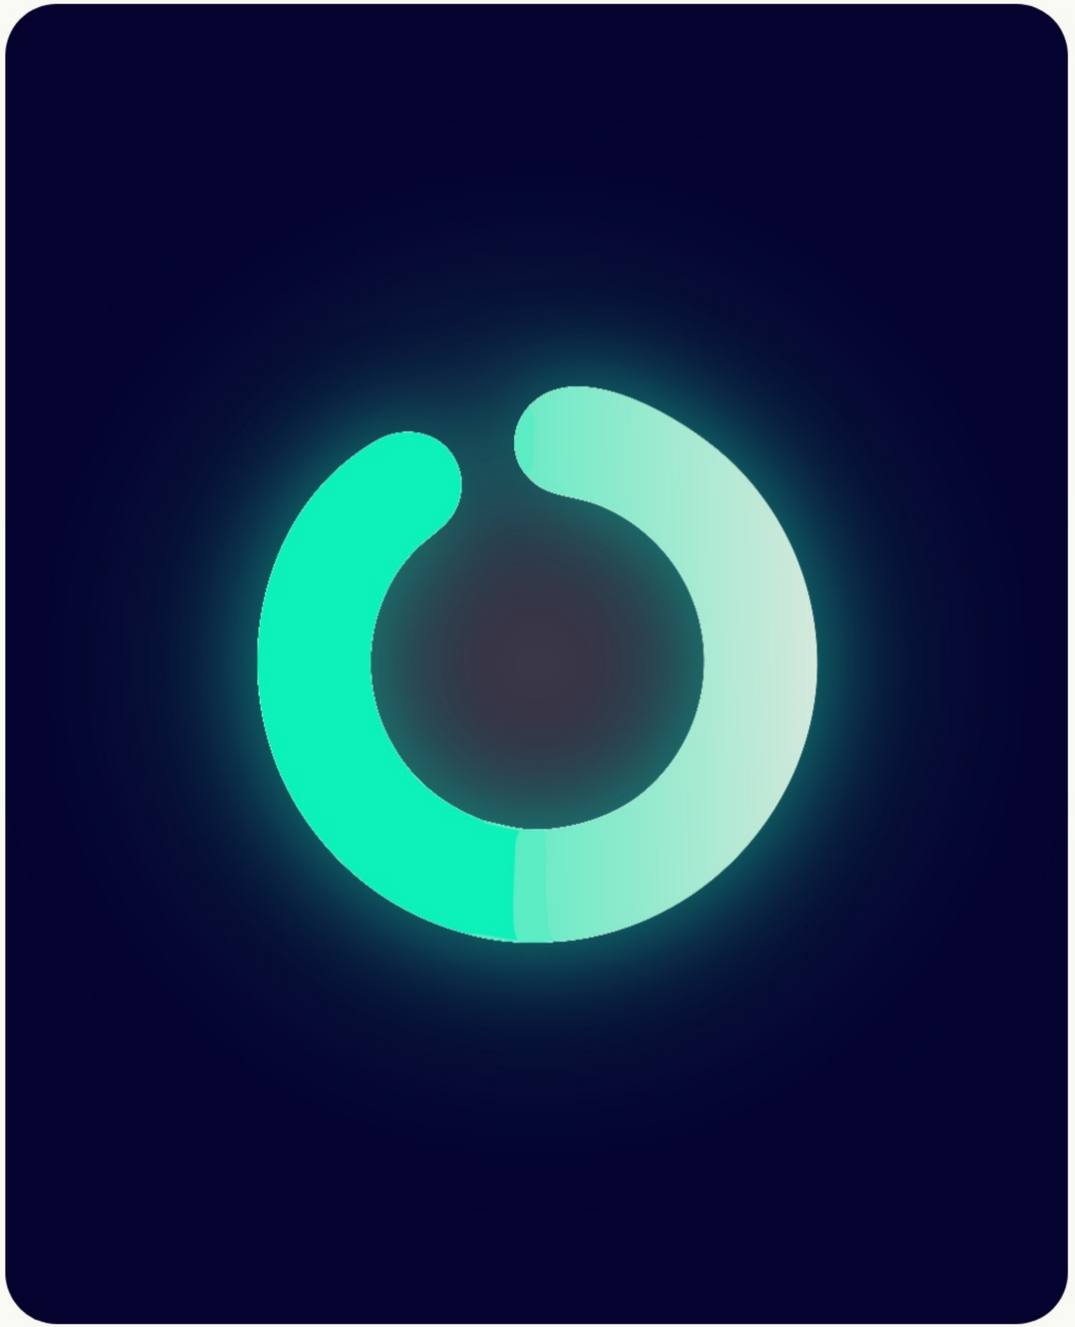

A closed ring is a boundary. Ours is open on purpose.

The gap = open source. Halo is built in the open, with room for anyone to contribute.

The ring = a halo of light. Help that surrounds you quietly, instead of a screen you stare at.

The gradient = on-device to cloud. Bright and close at the core, softer as it reaches outward.

Rounded ends = human. No sharp edges, nothing robotic.

02 · CLEAR SPACE & MINIMUM SIZE

Give it room to glow.

Keep clear space on all sides equal to the ring's stroke height × 2 — marked **x**. Nothing enters this zone: no text, edges or other logos.

FULL LOCKUP

halo

120 px digital
30 mm print

RING ALONE

24 px digital
8 mm print

One mark, four ways.

Primary
Default for light surfaces.

Reversed
Night Ink and dark photography.

Mono
One-color print, engraving, stamps.

App icon
Launcher, favicon, avatars, glasses HUD.

Please don't.

✕ Stretch or squash it

✕ Rotate it, or move the gap

✕ Recolor it outside the palette

✕ Place it on purple-blue "AI" gradients

✕ Add sparkles, stars or effects

✕ Retype the wordmark

Mint light on night ink.

Minimum body size: 16 px on screen, 10 pt in print. Sentence case everywhere. Never all-caps for more than three words.

A thoughtful friend who knows a lot.

Warm

We sound glad to help. Never cold, never transactional.

Clear

Short sentences, plain words. If a child can't follow it, rewrite it.

Honest

We say what Halo can and can't do yet. Failures are shown, not hidden.

Lightly playful

A smile, not a joke. Delight in the details, never at the user's expense.

Tone shifts with the moment: **celebratory** for wins, **calm and precise** for errors and privacy, **inviting** for contributors.

05 · SAY IT LIKE HALO

Do / Don't.

DO

"Done — your alarm is set for 7:00. Sleep well."

DON'T

"Task executed successfully. Alarm parameter configured."

DO

"I couldn't open that app. Want me to try another way?"

DON'T

"Error 403: Action not permitted."

DO

"This stays on your phone. Nothing is sent anywhere."

DON'T

"Revolutionary AGI-powered magic that changes everything!"

Avoid: "magic", "revolutionary", "AGI", "unleash", "seamless", jargon, fear-based privacy messaging.

The Halo voice.

A custom-designed brand voice: warm, calm and unhurried, with a soft smile in it. Neutral international English, crisp articulation that children, older adults and non-native listeners can follow easily.

Pace: unhurried, natural pauses

Pitch: gentle mid-range, gender-neutral leaning

Feel: reassuring, lightly playful, never robotic

Use for: onboarding, product videos, tutorials, voice replies

VOICE SAMPLE AVAILABLE IN THE HALO BRAND KIT

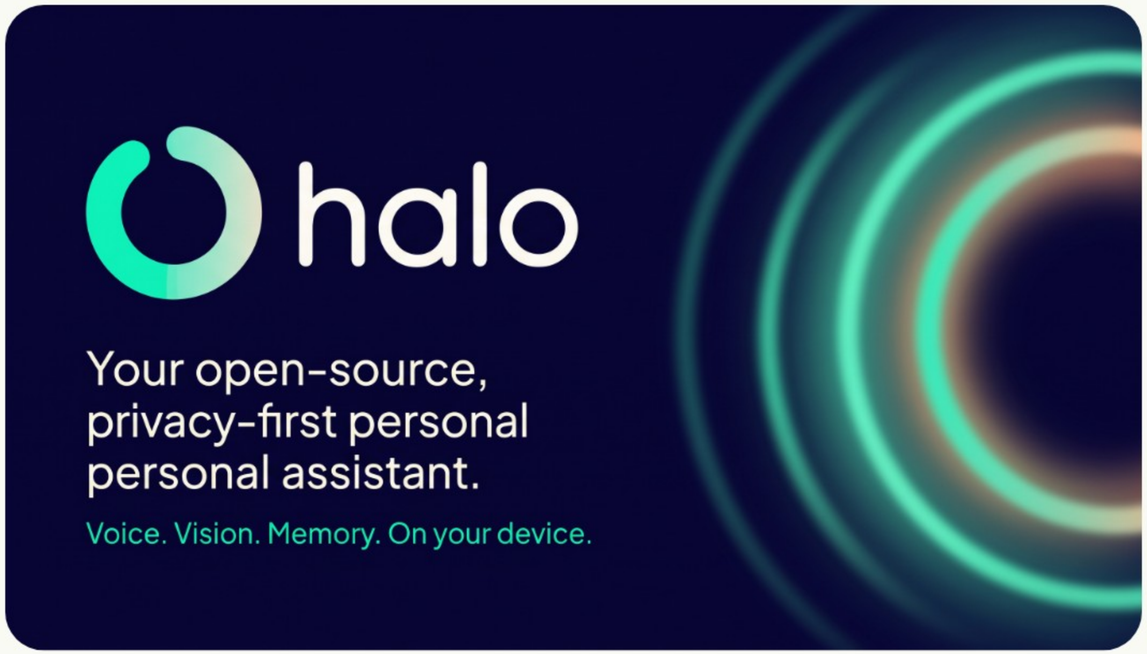

Show the light, not the machine.

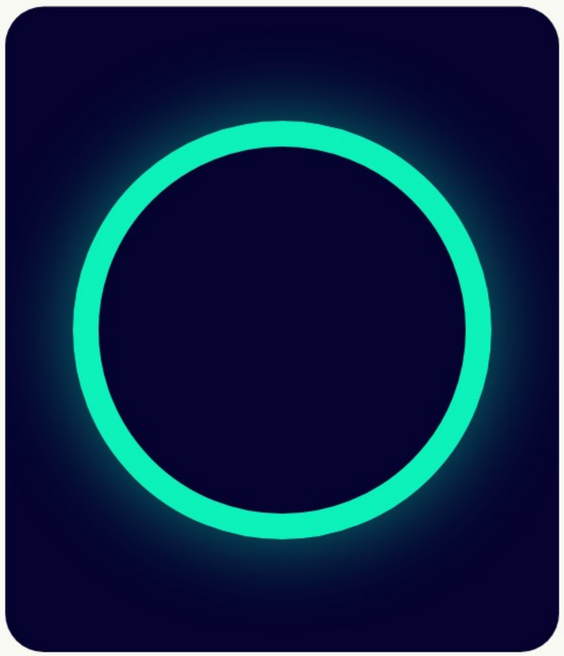

Motif: soft mint rings and glows that radiate, ripple or frame. Always calm, never busy.

Photography: real people in everyday moments — kitchens, buses, classrooms, workbenches. Natural window light, warm tones, Halo present but in the background.

Surfaces: Cream paper and stone in daylight; Night Ink for evening and focus.

Never: robots, glowing brains, circuit boards, sparkles, holograms, purple-blue neural gradients.

07 · APPLICATIONS

In the hand.

On every screen.
